

# Nutrient Schedule

All values in mL/L

STAGE	VEGETATIVE				FLOWERING							
WEEK	1	2	3	4	1	2	3	4	5	6	7	8
Gorilla Grow I	5	5	5	5	5	5						
Mass Bloom II							5	5	5	5	5	5
Overload III					2.5*					2.5	5	5
CalMag IV	2	2	2	2	2	2	2	2	2	2	2	2

### SHAKE WELL BEFORE USE

pH: Nutrient mix should be adjusted to between 5.8 - 6.2 pH after adding ALL nutrients, before feeding

EC: Adjust to 1.2-2.0 as required through addition of extra Grow/Bloom

Extra veg/flower time add weeks as necessary

For Foliar Feeding: Add only 2.5ml /1L water

\*Optional: Overload III can be used to enhance 'turning' in early flower stages

Notes:	VEGETATIVE	FLOWERING
